Student Information:

Name: - [   ]   **id** [   ]

Department:- [   ]   [   ]

Part – One- Choose the correct letter and write on the appropriate answer provided.

1. **Is the advance of what is going to be done and a fundamental successful operation to any business.**
   A. Backup   B. Plan   C. SW   D. HW

2. **Which one is assigning a resources after each task will take to complete a work.**
   A. Managing implementation   C. Resource   E. Feedback
   B. Schedule   D. User acceptance

3. **At some point the new technology will replace the existing technology is the success of a new technology implementation is _____**
   A. Converting data   B. User competence   C. Tasks   D. Timing   E. Creativity

4. **Formal new system technology is _____**
   A. Trade magazines   B. The internet   C. Networking   D. Formula   E. None

5. **The impact of new technology on the business is _____.**
   A. Gather information about technology and business strategy
   B. Identify the stakeholders and the impacts   C. Technical skill   D. A and BE. Psychological skill

6. **_____ Which one is an implementation planning forms an integral parts of integrating new technology in to an organization?**
   A. Mini research   B. Mini implementation plan   C. Gathering information. importing a feedback

7. **Verifying a new equipment's to be its functionality and performance before being integrated in to existing system is._____**
   A. Maintenance   B. Testing   C. Configuring   D. Process

8. **Which one is the strategies that can help users derive maximum benefits from new technology._____**
   A. Training and support   B. Direct knowledge   C. Consultants or expert D. All

9. **When before implementing a new technology you must consider ___ to protect equipment and your self.**
   A. Program   B. Occupational Health and safety   C. Current system D. Old system   E. HW

10. **The most popular method for conduction sessions where a client has to learn new practical skill is**
    A. Feedback   B. Demonstration   C. Theoretically   D. Knowledge

11. **Which is a type of good communication skills to get useful information about a something you want?**
    A. Questioning and active listening techniques   B. Direct knowledge   C. Do some research D. Clients   E. None of the above

12. **_____ Is to be conducted after the migration in to the new technology to assess the projects success or failure.**
    A. The need for evaluation   B. The process of evaluation   C. Planning evaluation D. New plan

13. **Assessment of the environmental impact of using the technology must be done against._____**
    A. Infrastructure   C. The values of feedback   E. Using feedback
    B. Resources   D. A and B

14. **The process of evaluation is _____**
    A. Collecting feedback   B. Configuring a new technology   C. Creating a new resource   D. All of the above

15. **The following is a type of skill essential in a acquiring and implementing new technologies is _____**
    A. Internal skill   B. Technical skill   C. External skill   D. A and C E. New technology

16. Which one of the following is does <u>not</u> cover all aspects of the new technology testing?
A. Automated testing   B. Ad – hoc testing   C. Integration testing   D. Removable testing

17. . Before installing whatever thing for our customer we need_____
A. Removing the previous data   B. Install a new technology   C. Backup our data   D. Form an oldest data

18. Which one of the following is not the most common aspect of minimpimantation?
A. Activity   B. Time   C. Test   **D.** Plan

19. It is types of network that cover large geography _____?
   A. LAN   B. MAN   C. WAN   D. FAN

20. _____ is defined as an elaborate and systematic action to get something is done .
     A. Strategy   B. Test   C. LAN   D. All

21. . What is to be done is considered during _____?
   A. Plan   B. Implementation   C. Test   **D.** All

22. It NOT generally outlines for test plan?
A. introduction   B. test items   C. test approach   D. test deliverables   E. No one

23. methods of file conversion
A. total file conversion   C. Phase conversion
B. gradual file conversion.   D. A & B

24. A type of test it designed to cover all aspects of the new equipment introduced?
   A. systematic testing,   **C.** Ad – hoc testing
   B. Automated testing   **D.** All

25. Management of technology includes tasks
A. overcoming resistance to technology
B. ensuring that users are competent in using the technology
C. monitoring the efficient use of the technology
D. monitoring the performance of the technology.

      Part –three –<u>Write the correct answer for the following questions according to their instructions</u>.
1) Mention at least 3 (there) source for identify new technology?
         A. _____   C. _____   E. _____
         B. _____   D. _____

2) Write types of testing?
   1. _____   2. _____   3. _____   4. _____

3) List at least three types of conversion?
   1. _____   2. _____   3. _____   4. _____

4) Define about the **<u>Internet?</u>**

_____

5) Write the types of network ?
   1. _____   2. _____   3. _____   4. _____
